FERPA Training for Researchers

All researchers listed on this application must have completed FERPA training and submit proof of certification with this application. All training must have been completed within 12 months of the application submission date. If this is a longitudinal request, please note that the PI is responsible for ensuring that all team members maintain a valid FERPA training certificate.

If your institution does not provide a FERPA training, please complete training offered through the US Department of Education: https://studentprivacy.ed.gov/content/online-training-modules
